

FSMA 204 Food Traceability Solutions

FSMA 204 AUDITS, TRAINING AND TRAKKEY DIGITAL TRACEABILITY PLATFORM

WHAT ARE FSMA 204 FOOD TRACEABILITY SOLUTIONS?

The US Food and Drug Administration's (FDA) Food Safety Modernization Act (FSMA) 204 aims to enhance food safety by improving supply chain traceability. The rule, also known as Requirements for Additional Traceability Records for Certain Foods, targets high-risk foods on the Food Traceability List and mandates detailed recordkeeping, traceability plans and rapid data sharing.

These measures support the swift identification and removal of contaminated food from the market, reducing risks and strengthening consumer trust.

Meeting these requirements can be complex, but you can confidently navigate compliance while enhancing your food safety management systems with our FSMA 204 Food Traceability Solutions, which include:

- FSMA 204 Audits
- FSMA 204 Training
- TRAKKEY Digital Traceability Platform

FSMA 204 AUDITS

Our FSMA 204 audits will help you meet the FDA's new traceability requirements. You can also leverage our audits to assess your suppliers and ensure the accuracy of the traceability data they provide. Preparing for these audits is essential for compliance and helps safeguard public health by ensuring your rapid response to contamination events.

Our audits focus on verifying your food traceability plan and ensuring the accuracy, completeness and timeliness of your key data elements (KDEs) and critical tracking events (CTEs). We will assess if your traceability systems can quickly and accurately track food items through the supply chain to improve food safety and minimize risks. Our auditors will identify gaps in compliance, recommend improvements to enhance operational efficiency and regulatory compliance, and validate your recordkeeping systems

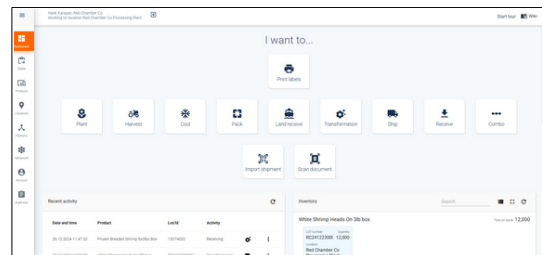

FSMA 204 TRAINING

Available online and face-to-face, our training courses provide in-depth guidance on FSMA 204 traceability rules, KDEs and CTEs. Through interactive sessions, case studies and practical exercises, you will gain the knowledge and skills necessary to implement a robust traceability plan and confidently navigate FDA inspections.

TRAKKEY DIGITAL TRACEABILITY PLATFORM

TRAKKEY, an enterprise-grade, digital platform, automates food traceability and enhances your FSMA 204 compliance journey with greater efficiency and data accuracy.

TRAKKEY is a powerful and scalable digital solution for real-time, supply chain-wide visibility that has been validated by billions of annual transactions in complex supply chains. TRAKKEY effortlessly integrates with your pre-existing IT systems and workflows, empowering you to enhance outbreak investigation, reduce recalls, improve product information and streamline line data sharing.

WHO IS IT FOR?

Food manufacturers, processors, seafood producers, produce farms, distributors, wholesalers, retailers, food services providers, logistics providers and exporters who trade or export high-risk foods within the US or to the US.

WHY SGS?

We are a leading provider of audit and compliance services for the global food industry, with extensive knowledge of FSMA requirements. By combining our expertise with the cutting-edge TRAKKEY digital traceability platform, we enable you to comply with FSMA 204 efficiently and confidently while delivering transformative value to food supply chains.
